

SOUTHWOOD PEST CONTROL

Preventive Pest Management – Serving Southern California

Established 1974 – State License #PR846 and #B866709

SPECIFIC ROOF AND PLANT RELEASE

It is recognized the covering of a structure for fumigations is necessary to walk on the roof surfaces carrying and distributing tarpaulin and damage will be incurred. Particularly in the case of slate roofs, tile roofs, and metal roofs the Fumigation and Termite Company will not assume any liability for such damage or consequential damage that will occur to roof coverings. The same applies to gutters, electrical wiring, patio, and awning covers, any type of solar panels, related plumbing, and living plans or landscaping at or adjacent to the property.

NOTE; Due to the roof being slate/tile metal, there will be extensive damage while performing fumigation services. If you desire an estimate for the cost of replacing the expected damage, please contact your roofer.

I _____ (owner of the property) located at (address given below)
_____ and release the above Fumigation and
Termite Company _____ of any and all liability for any damage
which will occur to the roof or any portion thereof.
